

WorkMate AI — Employee Handbook

Page 1 of 5

Purpose: This fictional handbook provides general workplace guidance for WorkMate employees.

Employees are expected to act professionally, communicate respectfully, and follow approved company procedures.

The handbook is a general reference; specific departmental policies may provide additional requirements.

Employees should ask HR or their manager when a rule is unclear.

This document is fictional and created for the WorkMate AI capstone.

WorkMate AI — Workplace Conduct

Page 2 of 5

Employees should communicate respectfully with colleagues, managers, customers, and support teams.

Harassment, threats, discrimination, and deliberate disruption of work are not acceptable under this fictional handbook.

Employees should use company resources responsibly.

Workplace disagreements should be raised through appropriate management or HR channels.

Employees should avoid sharing confidential company information with unauthorized people.

WorkMate AI — Communication and Collaboration

Page 3 of 5

Employees should use approved communication channels for work-related discussions.

Important requests should include enough information for the receiving team to understand the issue.

Employees should respond to reasonable work communications within expected team timelines.

Meeting participation, documentation, and handover practices may vary by team.

Employees should communicate planned absences or delays through the appropriate process.

WorkMate AI — Employee Responsibilities

Page 4 of 5

Employees are responsible for following applicable company policies and security procedures.

Employees should protect company devices, accounts, credentials, and confidential information.

Employees should report workplace, IT, security, or facilities issues through the correct support channel.

Employees should keep employee records and internal information private.

Employees should not bypass approval or access controls.

WorkMate AI — Getting Help

Page 5 of 5

HR handles employee policy, leave, and workplace-process questions.

IT handles approved technical support and system-access issues.

Facilities handles workplace maintenance and physical-office issues.

Security concerns should be reported using the approved security reporting process.

Document status: Fictional WorkMate AI project handbook for RAG testing; not a real employment handbook.
